

REACH Compliance Statement

November 30, 2022

(Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union Commission (EUC) Regulation on chemicals and their safe use. The REACH regulations became effective on June 1, 2007 and Replaces several European Directives and Regulations with a single system.

REACH establishes specific duties and obligations on a business in the European Union (EU) which manufactures or imports a substance or article that includes a "substance of very high concern" (SVHC) in concentrations of more than 0.1% w/w. A substance which is listed on the "Authorization List" published by the European Chemicals Agency (ECHA) (Annex XIV of the REACH regulations) cannot be manufactured for a specific use or uses. As of June 10, 2022, there are 224 substances on the SVHC candidate list and 59 substances on the Authorization List.

Further, the use of substances listed in Annex XVII of the REACH Regulations are banned in all articles or substances produced or imported in the EC except to the extent that the use complies with the specific restrictions contained in Annex XVII.

So, upon review of the formulations of these products and to Precision Marshall's knowledge:

- (1) Its products do not currently contain substances listed on the Candidate List of Substances of Very High Concern or the Authorization List, both as published by the ECHA on its website on the date of this statement, in excess of the applicable legal thresholds; and
- (2) All substance contained in its products are currently in substantial compliance with the current conditions and restrictions of Annex XVII of the REACH regulations. Precision Marshall will endeavor to appropriately update or modify this REACH Compliance Statement should any changes occur in the composition of Precision Marshall's products or the REACH regulations, including the addition of any substances on the SVHC Candidate List, the Authorization List or Annex XVII of the Reach Regulations.
